RACK MOUNT COMPUTER   *15 SERIES*

This is the most commonly used model for rack mount PC. All cables and wires are connected in the back of the chassis. A 3.5 dis k drive mounting kits and HDD door covers are included. Motherboard sits on a universal mounting plate for easy removal. A 12VDC fan is mounted behind front panel with filter to intake air and to pressurize inside to prevent dust entering.

We also carry a full line of high quality power supplies with redundant and hot-swappable features.
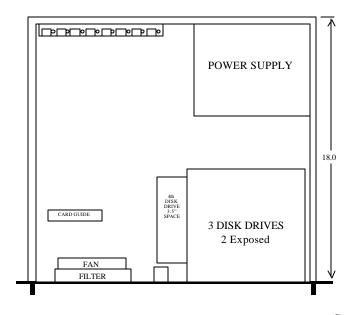

Other rack mount computer chassis are available from stock for Sun Micro System's AXMP motherboard and such.

FEATURE:

♦ fits all motherboard sizes (not included)
♦ standard height 5.25" / 3.5" drives
♦ 8 expansion slots
♦ fits standard power supply (not included)
♦ indicators for power and HDD
♦ EMI/RFI shielding structure
♦ ship from stock
♦ slide assembly available (see page 19)
♦ special modifications at low cost
